MESSAGE

K.Sahadevaiah
President

NAVAJEEVAN ORGANIZATION being one of the leading NGO in the SPSR Nellore district has delivering dedicated and committed services to the rural and tribal population. Since inception, the organization emphasized sustainable growth and development and ensured to build capacities of the local communities to live with self dignity and self reliance. It has not only brought commendable change among the vulnerable, downtrodden and marginalized communities but also brought change among the duty bearers thus resulted to increase the accessibility and availability of public services. It is evident that the community from the project areas are living with poverty, many initiatives from various players including the government has not brought desired change, keeping the facts the organization has sought financial support from NABARD to increase livelihood options. As it is said that 'health is wealth', with prevailed and preexisted conditions the community spending their earned income in availing quality health care from private, the organization recognized the situation and responded by educating people through awareness and also delivering health care through mobile medical unit at their door steps with qualified medical and Para-medical professionals. Women can bring drastic change not only within the family but also in the society, the organization

taken assistance from NABARD to build skills to the women in groups on fabric painting and hand embroidery and facilitating them to live with self reliance.

NAVAJEEVAN ORGANIZATION as a change agent in the society delivered quality information and services and thriving to achieve desired change among the poor and vulnerable especially Dalits and Adivasis. The cooperation and support extended by the donor institutions and their professional staff not only building confidence but also giving hope to the organization staff as well as beneficiaries. The organization may not able to achieve the objectives without the support of key stakeholder including leaders at gram Panchayat level, youth, women SHGs, village level functionaries such as ANM, ASHAs, Village Secretaries and above all duty bearers.

The organization leading with hope increases its resource base including human and financial to deliver existing beneficiaries but also to the newly identified needy people. We seek support from all those who want to see the smiles among the needy by contributing in any manner.

Looking forward to achieve new endeavors in future....

BACKGROUND AND INTRODUCTION

NAVAJEEVAN ORGANIZATION has emerged during 1996 when the situation in and around tribal and rural villages was in dire condition due to poverty, lack of commitment to deliver services by the duty bearers, poor infrastructure and harassment and dominance of money lenders what not. A group of development practitioners who have commendable experience in understanding the conditions of tribal and rural communities, who has executed activities including social entitlements, creating awareness on human rights and land related issues came together and established the organization to balance the imbalance and bring the equity.

Community and key stakeholders including rights based organizations and donors extended their support to the NAVAJEEVAN ORGANIZATION to reach unreached people and empower them to access and avail their basic and fundamental rights. Since inception the organizations has focused on creating awareness and fight for their rights by themselves by the Dalits and Adivasis and initiated various programs at Venkatagiri, Balayapalli, Dakkili, Ozili Mandals. The organization implemented all the activities with the people's participation and build people's institutions. In post tsunami it has started working with victims in the coastal belt in Kavali, Bogole, Allur, and Vidavalur, Indukurpet, and TP Gudur Mandals covering 50 villages in Nellore district. The community development process i.e. sensitization, capacity building has emerged as one of the key interventions.

Based on the needs and interests of the communities the organization has taken up projects including STI/HIV/AIDS and bringing behavior change among the vulnerable and high risk population including female sex workers

VISION AND MISSION

Vision: To improve the livelihoods and protect the rights and education of the marginalized Communities

Goal: Empowerment of oppressed and depressed Communities

LEGAL STATUS

- Registered under Societies Reg Act XXI of 1860.No.125/1996 by the District Registrar, Nellore.
- Registered U/s 12AA of the Income Tax Act 1961 at 12/A & 80-G of IT Dept. H.Qrs. No. I 219) NLR 05-06.
- Registered under Foreign contribution (Regulation) Act, 1976, with the Registration No. 010310134, Dated 17-01-2001.
- Permanent Account Number: AAATN6182G

PROGRAMMES

Time to time the needs and interests of the needy communities are varies and required different strategies and approaches. To fulfill the necessary and identified needs of the poor and vulnerable communities the 'NAVAJEEVAN ORGANIZATION' has executing tribal and rural development and environment projects during 2015-16 apart from health, education and environment. NABARD is one of the institutions that provided guidance and financial support, APSACS and HLPPT has extended continuous support to outreach high risk people and deliver STI/HIV preventive information and services. SRUTI is one of the institutions that have built the capacity to the organization and its staff

GEOGRAPHICAL AREA

The Sri Potti Sri Ramulu Nellore district is bound on the North by Prakasam Districts, on the east by Bay of Bengal, on the South by Chittoor District and Tamilnadu State and on the west by Veligonda Hills which separate it from Kadapa district. The districts cover an extent of 13,076 sq. mt. It is divided into three revenue divisions Viz, Nellore, Kavali and Gudur. It is situated between 13 _ 25' to 15 _ 55 'N of the Northern longitude and 79 - 9' to 80 _ 14' of the Eastern longitude. The district as much as 20.09% of the total area is occupied by forest. By all forest is not productive. Class I forests which are being under scientific management for a long time past registered good growth.

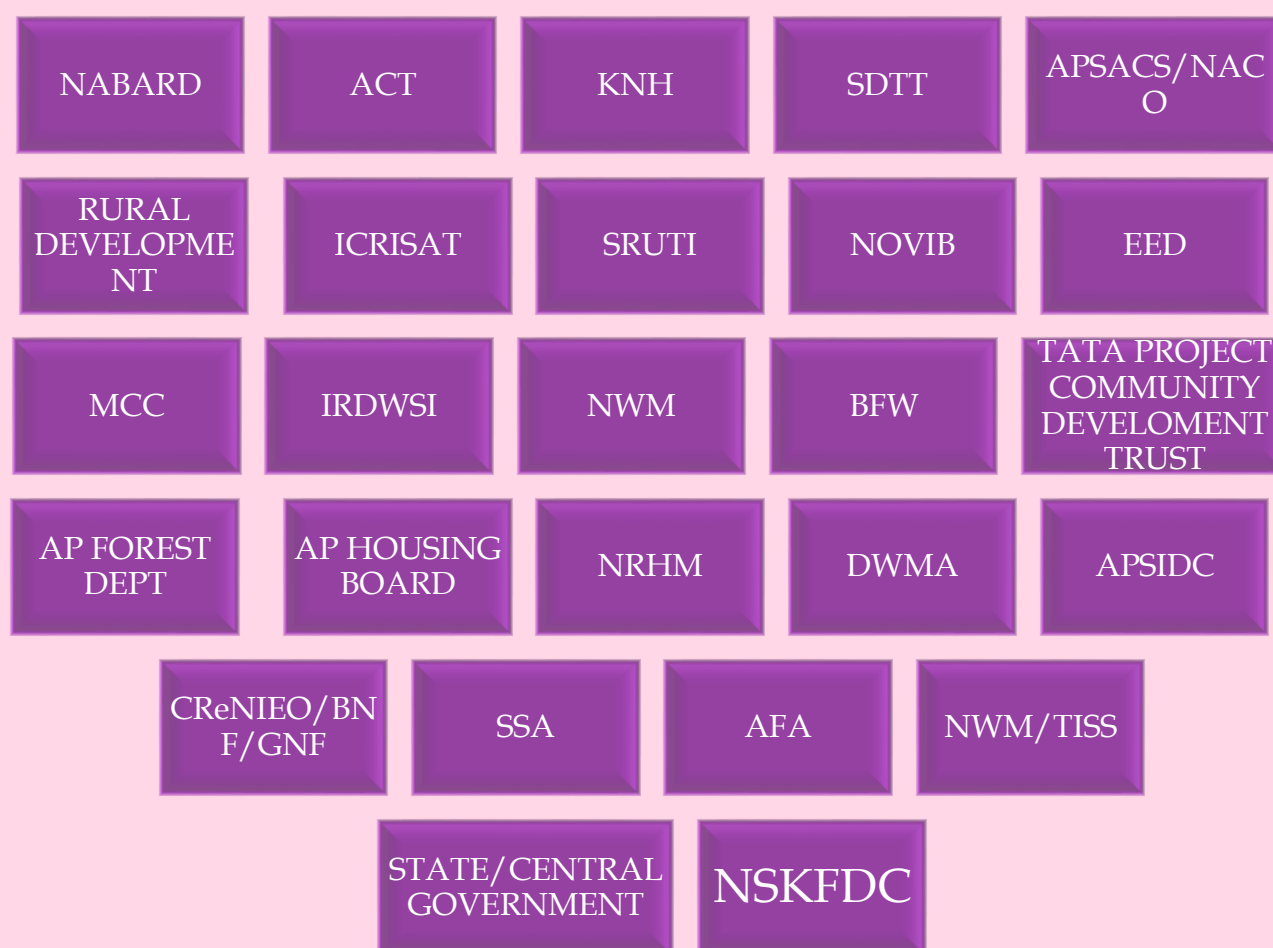

The district has a total population of 26, 68,564 at density of 204 persons per sq. km. As the district is predominantly rural, the ratio of urban population (5 towns) to rural population is as low as 22:78. As per 2001 census, the overall literacy rate in the district was 65.08%. The literacy rate among males is much higher 56.93% in comparison of females 43.07%.

BENEFICIARIES

Tribal, Dalit, fisher Folk, farmers, female sex workers, physically challenged People, Migrant Children, Women, Children and Youth.

Donor institutions/organizations/departments

DETAILS OF ONGOING PROGRAMS

TRIBAL DEVELOPMENT	
1	Wadi development for tribal farmers in Nellore district Under Tribal development fund (TDF)
SUPPORTED BY	NABARD
TARGET POPULATION	Tribal community
PERIOD	2010 onwards (ongoing)
LOCATION	Venkatagiri and Dakkili Mandals

RATIONALE

The tribal economy in the state is primarily subsistence oriented and based upon a combination of agriculture, forestry and wage labour. Although tribal are mainly dependent on agriculture, collection of forest produce continues to play a major role in household consumption and income generation. With the decline in output from forests, tribal are increasingly dependent on seasonal wage labour, both agriculture and unskilled labour. The livelihood and survival of tribal largely rest on their access to land and forest. The legal status of tribal lands is at time complex and takes many different forms.

The land holding pattern of tribal farmers, mainly **YANADIS**, in the district is below 1.0 acre. Majority of them live nearer to foothills and occupy marginal lands, which limits productivity of crops. Often they cultivate dry land crops due to lack of perennial source of irrigation. Generally one crop i.e. Ground nut is cultivated during the South West Monsoon (June to October). Rice, if cultivated, is mostly used for consumption purposes without any marketable surplus. Thus income generation from agriculture is low. Other subsidiary activities like sheep rearing are also limited as community forest programme is under implementation in the district, which prohibits entry of livestock into forests. The prevailing agricultural situation in the district offers low income livelihoods of people is not sustainable.

NAVAJEEVAN is approached NABARD for a holistic development of the Yanandi's through assistance under Tribal Development Fund.

Wadi programme being implementing to uplift 751 tribal families in two Mandals of Nellore district viz., Venkatagiri and Dakkili have been identified for implementation of. This block is predominantly inhabited by tribal population. Soil and climatic conditions of these Mandals is ideally suitable for wadi development. The area is near to Krishnagiri and Rajamandry which is known for quality planting material. The nurseries in Krishnagiri can supply planting material for the project.

GOAL	OBJECTIVES
The objective of the Tribal Development Fund created by NABARD is to spread the message of wadi model of tribal development. The fund will be utilized to create the necessary frame work conditions to replicate and consolidate the successful initiatives under wadi programme in the Government and Non-Government sectors. The ultimate goal of the project is to stabilize the livelihood of participating tribal communities through	• To achieve sustainable economic development of selected tribal families through participatory approach • Implementation of environmentally friendly income generating activities, • Immediate and project results (output) • Formation of peoples organizations • Participation by women in development process and their empowerment • Provision of adequate health facilities • Employment generation in the project areas. • Augmentation of family income by

MAJOR ACTIVITIES

- Pits of 1mx1mx1m to be dug during the month of April and it will left as it is for at least one month so than planting can be taken up in the month of Sep to Nov i.e. during monsoon season for 200 acres.
- Preparation of seedling for taking up 150 acres planned for next year.
- Applying manures and fertilizers, irrigation for the wadi of first year.
- Conducting training programmes to farmers of mango and lemon management practices
- Establishment of orchard of the selected fruit crops as a foundation economic activity.
- Utilization of border of the orchard for planting of multipurpose forestry and economical species to meet the fodder, firewood and timber requirement of tribal families thereby reducing their dependency on forest.
- Adoption of in situ soil conservation measures to arrest further degradation of soil and shaping of the land to make it suitable for establishment of orchard.
- Development of water resources individually or on community basis to provide protective irrigation for fruit plants. The emphasis is on dry land horticulture.
- Providing irrigation during the critical period by adopting the time-tested water saving pitcher irrigation technique.
- Adopting of improved farming techniques, by capacity building of the participating farmers through technology interventions, training, and exposure visits etc. to improve the crop productivity, production and quality of the produce.
- Promotion of community health by educating the community on basic hygiene, nutritional aspects of food, primary treatment of minor ailments and herbal and kitchen gardens in the back yards.
- Drudgery reduction measures especially for women by supporting activities, which will not only reduce the drudgery but also save the time to perform the routine house

KEY ACHIEVEMENTS

- 500 acres of barren land transformed into cultivated land, developed as a horticulture plantation (Mango and Lemon);
- 38000 pits dug for 21500 mango plants and 16500 lemon plants;
- 500 acres of land developed and protected with boarder plantation with 2000 teak plants, 800 guava plants, panasa plants, 8000 curry leaves;
- Supplied manures and fertilizers to the 200 farmers;
- Provided 40 bores for irrigation during the critical period by adopting the time-tested water saving pitcher irrigation technique through drip irrigation in coordination and convergence of Andhra Pradesh Micro irrigation project (APMIP);
- Improved crop productivity, production and quality of the production through improved farming techniques and series of capacity building trainings and exposure visits. 300 farmers enhanced their knowledge on mango and lemon management practices through training programmes;
- Awareness created through cultural campaigns for promotion of community health including basic hygiene, nutritional aspects of food, primary treatment of minor ailments and herbal and kitchen gardens in the back yards;
- 150 cooking plot forms constructed;

Case study:

"We are marginalized tribal communities we are keen on our traditional livelihoods and we lost inalienable rights as indigenous people, since independence we were deprived in systematic execution of government's developmental schemes and programs that meant to improve our life. MAATHOTA program has given hope and its going to help us in our future".

TRIBAL AND RURAL EMPOWERMENT	
2	Farmers Clubs
SUPPORTED BY	NABARD
TARGET POPULATION	Small and Marginal Farmers
PERIOD	2010 onwards (ongoing)
LOCATION	Venkatagiri,Dakkili and Balapalli Mandals

RATIONALE

Land and agriculture are the major and basic components, which are closely associated with rural Indian economy. Farmers need to be educated on new and appropriate technologies in agriculture to meet the demands. This situation can be improved collectively, rather than individual. Hence the concept of “Farmers clubs” was introduced with the support from NABARD. The clubs are further developed with objectives to develop collective effort for dissemination of technological information, to evolve a forum among farmers, to develop optimum usage of bank services in agriculture, to promote farmer linkages with markets, companies for agriculture produce, to organize exposure visits for better experience and to disseminate information on new policies, rules and regulations. Navajeevan has promoted 40 Farmers Clubs in Venkatagiri, Dakkili, Balayapalli and Chittamuru Mandals and started strengthening the clubs with required information and knowledge.

Land and agriculture are the major and basic components, which are closely associated with rural Indian economy. Farmers need to be educated on new and appropriate technologies in agriculture to meet the demands. This situation can be improved collectively, rather than individual. Hence the concept of “Farmers clubs” was introduced with the support from NABARD.

OBJECTIVES

- To develop collective effort for dissemination of technological information
- To evolve a forum among farmers
- To develop optimum usage of bank services in agriculture
- To promote farmer linkages with markets, companies for agriculture produce.
- To organize exposure visits for better experience
- To disseminate information on new policies, rules and regulations

KEY ACHIEVEMENTS

- The organization has promoted 50 Farmers Clubs (1000 members) in 50 gram Panchayats Venkatagiri, Dakkili and Balayapalli Mandals and started strengthening the clubs with required information and knowledge.
- Members from farmer's clubs actively benefited from 100 Veterinary animal health camps being conducted.
- Farmers clubs benefited from 50 Baseline orientation training program (BLOTP) at village level;

Case studies

"Farmers Clubs not only obliged us to come together as groups but also taught us to farming in organized manner. NAVAJEEVAN helped us in low cost production by organic farming and assisting us in supplying the products. It has helped us in reducing our debts and also earning for our livelihood.

P.Koteswar Rao , Chelikam Paduvillage, Venkatagiri Mandal, Nellore district.

We have participated in the training programs and learned the new technology and also shared our indigenous technology to produce organic products, it gives us to become more confident to plant mango plants and lemon plants in our land which was not given yielding results in the past. The NABARD and Navajeevan changed our life and build confidence among our farmers that whatever the products we produce will get good price in the market.

K.Sankar Reddy, Matumadugu Vvillage, Dakkili Mandal, Nellore district.

General Manager and Asst. Manager of NABARD visited our village and inspected the

WOMEN EMPOWERMENT

3 NAVAJEEVAN MUTUALLY AIDED COOPERATIVE THRIFT AND CREDIT SOCIETY (MACTS)

SUPPORTED BY	NAVAJEEVAN ORGANIZATION
TARGET POPULATION	RURAL & URBAN COMMUNITY
PERIOD	2012 onwards (new)
LOCATION	Venkatagiri , Dakkili ,Balaiahpalli and Kavali Mandals

Goal & Objectives:

The objective of the society is to promote economic and social betterment of its members by encouraging the petty shops, training centers, educational centers, diary, poultry, reeling centers small-scale industries, sheepraring shops super market, through thrift, Self-help, and mutual and in accordance with the principles of cooperation as enunciated in Section 3 of the Act.

Key Achievements:

- 76 villages covered in Venkatagiri, Dakkili, Balayapalli and Kavali Mandals
- Formation of 389 JLG groups and 2145 Members
- 2145 members as share holders
- 3.60 cr Loans distributed to the Members
- Mobilize loans from NABFINS Rs.1.3 cr
- Mobilize savings Rs. 14 lakhs from JLG groups

HEALTH**4 Prevention of STI/HIV/AIDS (Targeted Intervention) Project**

SUPPORTED BY	Andhra Pradesh State AIDS Control Society(APSACS)/NACO
TARGET	Female Sex Workers
POPULATION	
PERIOD	April 2011 onwards (ongoing)
LOCATION	Venkatagiri,Naidupet,Sullurpet,Tada, Kota and Vakadu Mandals of SPSR Nellore district

RATIONALE:

NAVAJEEVAN ORGANIZATION is implementing STI/HIV/AIDS Targeted Intervention project for Female Sex Workers to prevent HIV transmission with support of Andhra Pradesh State AIDS Control Society and HLPPT. As per the guidelines of NACO and APSACS, project is being implemented with a clear laid down strategies i.e. Outreach communication, Health Services, Condom Promotion, Care & Support to PLHA, Enabling Environment and Community mobilization. Objectives of project is to sustain and proper use of Condoms, to mobilize the community for development community participation, to reduce the vulnerability of HIV infection among the FSWs through awareness generation, to reduce STI/STD among targeted population and to

GOAL

The “Zero Infection and Zero Discrimination” in six Mandals of Nellore district and providing quality health services for all the identified and registered FSW &MSM in the region.

OBJECTIVES:

- To prevent new infections (saturation of HRG coverage) in the year among all HRGs.
- To increase 100% knowledge levels on STI/HIV/AIDS among targeted HRGs within the year.
- To improve health seeking behavior among HRGs
- To increase consistent condom usage among all HRGs in the Nellore rural areas.
- To establish quality of STI services and increase utilization of the services
- To create good environment among sex workers with GOs, NGOs, Political and others.
- To empower and strengthen the Community Based Organization thereby to struggle for the common issues of the HRG

STRATEGIES

- Development of the outreach plans according to Micro planning.
- Develop the system of Monitoring at ORWs level. Planning for the weekly, monthly, quarterly, half yearly and annually wise programs and as well as the Action plan with planning.
- Establishment and strengthening of Referral system - All Target Group must attend quarterly once for Regular Medical Checkup, yearly twice for HIV testing at ICTC and STD screening and treatment through referrals.
- Increasing usage of Social Marketing of Female Condoms.

MAJOR ACTIVITIES:

- Successful Micro planning work for reaching and to provide quality services to community through PEs.
- Condom promotion (free and social marketing)
- Providing treatment for STIs to FSWs & MSMs and their clients through Static clinics
- Reaching out unreached through alternative health service provision- PR Clinics
- Strengthen the Mandal convergences with all types of stake holders and reach the need of community.
- Special events organized to create recreation and enthusiasm to community.
- Review meetings with staff and community
- Preparation of community led BCC materials.
- Staff support, monitoring visits to strengthen the abilities of PEs.
- CMIS and documentation for assessing intervention performance and to

KEY ACHIEVEMENTS:

- Conducted Social Networking Analysis and prepared outreach plan to deliver information and services;
- Target people are in the process of changing their high risk behavior to low risk through behavior change communication messages that are being developed and supplied by the SACS;
- Risk reduced from high volume to low volume through one to one sessions, one to group sessions;
- Increased health seeking behavior
- Awareness level Increased on the HIV, STI and Condom;
- Improved in RMC referrals, ICTC referrals;
- Aailed ART treatment and increased adherence;
- Improved Partner treatment;
- Reduced STI cases by improved syphilis testing;
- Increased access to mainstream health services;
- Increased access and Usage of condom with partner by increased utility of SM condoms;
- Increased awareness on Female condoms;

Case study

We are protected and protecting others by using condoms which are supplied by our peer educators of Navajeevan.

- Meramma FSW, Naidupet,

Earlier I used to participate in sex without using condom when the customer gives more amount, after visiting STD clinic I learned the severity and consequences.

- Yellamma FSW, Naidupet

ENVIRONMENT	
5	UPNRM-Livestock Farming under sustainable NRM approach
SUPPORTED BY	NABARD
TARGET POPULATION	Tribal and Rural population
PERIOD	December 2012 (onwards)
LOCATION	15 Villages of Venkatagiri, Dakkili and Balayapalli mandals

OBJECTIVES:

The objective is to provide sustainable livelihood opportunities with a shorter gestation period which can converge well with the existing initiatives under Farmer clubs and TDF.

- To provide sustainable livelihood opportunities to the farmers with a combination of horticulture and livestock.
- Demonstration/Multiplication of sustainable integrated models.
- To conserve the available natural resources.
- To improve the overall family situation in terms of child education, health etc.
- To generate income by providing additional livelihoods, this will also sustain the interest of people in development of horticulture plantations.
- To introduce improved breeds of live stock.
- To provide quality organic manure to the existing plantations/crops and promoting organic farming supported to NEDCAP
- To provide clean fuel (biogas) and reduce the dependence on LPG and forest fuel.
- To provide the animal power to the farmers.
- To provide timely and adequate credit to the intended borrowers at reasonable interest rates.
- To develop common property resources like wastelands, fallows, hillocks, pond Catchment areas etc., so that they can provide adequate grazing area to the livestock
- To develop income generation from fish rearing in village tanks.

MAJOR ACTIVITIES

- Integrated Dairy farming at individual farm level, community level and Farmers level;
- Sheep Rearing

GOAL:

The overall goal of the project is to provide sustainable livelihoods opportunities to tribal and other communities in an integrated manner, with a view to augment their income levels based on sustainable natural resource management and to reduce their dependence on the forests and conserve the natural resources

KEY ACHIEVEMENTS

- Increased household income through regular returns from the sale of milk;
- Facilitated the farmers for usage of NPM/Organic farming and the farmers are able to save expenditure on inorganic fertilizers;
- Conservation of natural vegetation in and around the tribal areas increased;
- Converted mango plantations/agricultural crops into organic with the use of Vermicompost on the large scale. Improved soil conditions and usage of inorganic fertilizers minimized;
- Increased participation in the meetings by the farmer clubs and VTC and decisions taken regarding purchase of animals etc;
- Committee formed to identify the beneficiaries;
- Monitoring systems established for loan utilization and ensured repayment of loans;
- Coordination meetings held with the NGO and government departments to minimize the issues;
- Process initiated to procure materials for construction of biogas plants;

Case study

Most of us are deprived of our community property resources, being a tribal we are dependent on natural resources, hence many new laws made our life vulnerable and we are no where except to search for livelihood at other places, at this point NAVAJEEVAN has entered into our lives and shown us the way to live by adopting traditional practices in developing natural resources which were abandoned by the government. The NRM not only giving a hope for us but also for our children including food, work and income.

- Gopal Naidu Village elder, Nadim Palli Village, Dakkili Mandal, SPSR Nellore district

HUMAN RIGHTS	
6	EMPOWERMENT OF RURAL POOR
SUPPORTED BY	SRUTI
TARGET POPULATION	Rural Population
PERIOD	2003 onwards (ongoing)
LOCATION	5 Mandals

RATIONALE

Low awareness on all government programmes lead to increase the poverty among the Dalit and ST and poor communities. These communities are deprived of Housing, Land pattas and land development. Limited efforts made by the government to unite the poor community i.e SC/ST/BC to committees at village, mandal and central level. Non utilization of peoples own platform to discuss lead to solve their problems by themselves.

The community unable to file the cases on issues on Un-touchability and all kinds of discriminations due to less power and negotiation skills and lack of legal support. They are been unable to capacitate the food and livelihood rights, education and health rights and Human rights. The Yanadi communities have been living on coast and fishing in creaks, neglected by the Govt and Donors during Tsunami in Nellore District. The Yanadis are in the vulnerable situation.

Community involvement, participation is an essential in planning, implementation and monitoring of any program. To achieve this community based organizations to be developed in the program area among women, men, youth and children. The groups / institutions will be equipped with knowledge regarding acts such as NREGS, Forest land, tribal act, PRI,

OBJECTIVE

To empower the target groups to exercise and access their basic Rights

MAJOR ACTIVITIES

- Village level meetings: community meetings were conducted in 95 villages. issues discussed in these meetings are land, Land development, Livelihoods and employment in NREGS, health, education and entitlements such as pensions, ration cards, health and education etc.
- Land Mobilization: One of the key interventions. Previously union has initiated, people institutions to submit application to the concerned officials regarding land mobilization. Union had continuously met District collector and Thasildars at grievances and submitted applications.
- Campaigning on forest rights Act: Navajeevan has given priority to build awareness on “forest rights Act” among Yanadi community. Hence awareness meetings are regularly conducted in all Yanadi villages to educate about Act. People institutions represented applications to District Collector and Sub-collector regarding land pattas.
- Land Development: Land development under CLDP is another major issue. During reporting period, land development activities i.e. removal of bushes, stones / boulders in 938 acres of land from three Mandals. People will take up cultivation soon after monsoon starts, which is for first time they are involved in their own lands.
- Livelihood resource development (as part of NREGS): NREGS is one of the livelihood options as well as the resource to develop individual / community lands. During last year, people did involved clearing of bushes, removal of boulders etc, in their lands.
- Employment under NREGS: Village committees have given regular inputs for making use of employment in NREGS. To initiate the process effectively at community level, wage seekers associations are formed educated the process of demanding work, submitting applications, regular payments etc.
- Housing: Accessing of housing to all union members is one of the objectives of the organization and Union. Union had organized village level meetings and made them to apply for houses. Union leaders did follow up of this issue with concerned officials.
- Basic Facilities (Linking roads, Education, Health): The issue of children education has been regularly discussed in village and mandal level meetings. Retention of the children in schools and hostels was focused. Awareness meetings are conducted in 98 villages from Venkatagiri, dakkili and Balayapalli Mandals.
- Rights of Physically Challenged: Union and project staff could able to Mobilize Medical certificates for 20 physically challenged persons

KEY ACHIEVEMENTS

- Empowerments of rural poor (Union) works are being processed as the developed actions plans. Based on the previous experiences, and needs of the people empowerment activities are carried out. Needs identified are land mobilization, land development, utilization of NREGS, Housing program, Advocacy – Entitlements, Health, Education etc.
- Awareness increased among the rural community on mobilization and utilization of government funds (IKP) and banks. Learned proper utilization and repayment patterns and support by banks has been enhanced;
- Community able to deal their land related and other issues themselves and submitting their grievances to the district authorities (District collector and Thasildars);
- Increased awareness among tribal and rural communities on forest rights act;
- Community able to understand the importance of work started demanding as per the need, could able to mobilize and work 90 days.
- Families are developing own lands thus resulted to reduction of migration for survival/livelihood;
- Community initiated negotiations with government official and PRIs to link the remote rural village roads;
- Community participated and contributing in reduction of school dropout rates, school management meetings and children's extracurricular activities;
- Accessibility and availability of government health services and facilities increased due to increased awareness on public health and communicable diseases;

SMALL AND MARGINAL FARMERS SUSTAINABLE LIVELIHOOD	
7	PROMOTION OF HORTICULTURE AND VEGETABLES FARMERS PRODUCER ORGANIZATION
SUPPORTED BY	NABARD
TARGET POPULATION	Horticulture And Vegetables Farmers
PERIOD	2013 onwards (ongoing)
LOCATION	5 Mandals

RATIONALE

Formation and promotion of FPO's was initiated by NABARD during the year 2015-16. NABARD has organized a one day orientation work shop on Formation and promotion of FPOs in Andhra Pradesh at Rythu sahakara verusenaga Mill at Guttur village in Penugonda Mandal of Ananthapur District on 26.02.2015. NGOs from Nellore, Chittoor and Kadapa districts participated in the meeting. CGM memen garu addressed the meeting and explained about the importance of the FPO promotion.

Navajeevan started initiating the process of FPO formation. We have conducted formal and informal discussions with the producers in SPSR Nellore District. After series of discussions and consultations, we have decided to form Horticulture & Vegetable farmers FPO's in 5 Mandals. So we proposed to establish 1 producer organization in 5 Mandals on Horticulture and Vegetable farmers Producer Organization. 5 Mandals are

1) Venkatagiri.2) Dakkili 3) Balavanally 4) Chillakur 5) Gudur

In order to provide first hand information, better understanding and exposure to all the representatives of the 5 proposed FPOs, we have organized an exposure cum study work shop for the identified representatives of 5 FPOs. 10 representatives from each FPO has participated in this one day programme

LAUNCHING OF THE PROGRAMME

We organize Horticulture and Vegetable farmer's producer organization launching on 11th Oct 2015, Inaugurated by Mr. Ramesh Babu, AGM, NABARD Nellore and has started the programme. 500 farmers are participated in this inauguration programme and they are sharing their experiences and issues about their products and marketing. AGM explained about the importance of the programme and he has explained about NABARD, present initiation of FPO,s role of the farmers in promotion of their own FPO,s. President Navajeevan has explained about the practical problems and the mechanisms to overcome from the initial problems. After that , one member from each Mandal FPO has explained their understanding on the FPO', need of the FPO in their Mandal and some of the problems existed in the Mandals.

Primary parts of a business plan.

- **Business concept** – Industry, Business structure, Product / Service, Strategies to make business a success.
- **Market** – Assessment of market demand and supply. Potential customers - who and where they are, USP of the Product, Suppliers of raw materials, Competition in the market etc.
- **Finance** – Sources & Uses of Funds, Cash Flow statement, Balance Sheet / PL and other financial ratios, such as break-even analyses.

SAFE DRINKING WATER

8 SAFE DRINKING WATER

SUPPORTED BY	Tata Projects Community Development Trust and Tata Water Mission
TARGET POPULATION	20 lakhs of rural & Urban People in SPSR Nellore and Chittoor districts
PERIOD	2014 onwards (ongoing)
LOCATION	5 Mandals

GOAL

To empowerment of the village people for sustainable development through water, Health, hygiene and environment in village unit model

OBJECTIVES

- To reduce the diseases burden especially arising out of water borne and to provide potable water of 20 ltrs in a can for Rs.2.00 to each household in rural areas under the scheme of "NTR Sujala Pathakam" in Andhra Pradesh.
- To provide safe drinking water for 20 lakhs of people in Andhra Pradesh through establishment of 600 RO plants through promotion of Social entrepreneurs.
- To promote local social entrepreneur especially SC/STs

Major Activities

- Visit identified village location with RWS team and Sarpanch
- Source identified and Renovation of building for installation of RO Plant
- Identification of SC/ST social entrepreneur (who is ready to contribute 10% of the plant cost)
- Take a resolution from Gram panchayat
- Take agreement/relevant documents from Social entrepreneur, Gram Panchayat Sarpanch and NGO
- Meet and discuss with concerned bank for loan requirement
- Submitted the all documents to bank
- Conduct on feasible Survey of door to door
- Find out the size of RO Plant through survey findings
- Request Order to TATA Project for RO Plant
- Installation of RO plant
- If more people asking for door delivery of water then Identified transporter for supply of can water
- Collection of Applications from consumers
- Collection of declaration from consumers who want door delivery of purified water
- All data and application documented through MIS
- Launching of RO plant with officials/Political leaders and local people
- Collection of monthly requirement purified water cans amount at the rate of Rs.2/- per 20 ltrs can from the consumers
- Distribute purified drinking water to consumers regularly with quality
- Monitoring regularly
- To form a village committee
- To Conduct PRA and Identify the village issues like health, Sanitation, education, livelihood and environment in the village for model village
- To make action plan for above issues to resolve
- To Conduct health camps, awareness camps
- To plan for Village (house) and avenue plantation for greenery and environment
- To plan for 100% sanitation and construction of latrine's
- To conduct skill trainings for youth groups/individuals/women/PWDs
- To make IEC Material
- To promote youth clubs

WATER MISSION	
8	CONSERVATION OF WATER, MINIMIZING WASTAGE AND ENSURING EQUITABLE DISTRIBUTION THROUGH INTEGRATED WATER RESOURCES DEVELOPMENT AND MANAGEMENT
SUPPORTED BY	NWM/TISS
TARGET POPULATION	Chittoor district
PERIOD	2018 onwards (ongoing)
LOCATION	Chittoor District

MAJOR ACTIVITIES

- i. Awareness about the local water problems,
- ii. Sensitization of PRIs and village level institutions,
- iii. Create/ train the local leader/PRIs to promote the water actions,
- iv. Improvements in the condition of watersheds, Streams, Rivers and Aquifers by introduction of technological advancements blended with traditional know-how of the local communities,
- v. Innovate, develop, field-test, adapt and disseminate techno-economical solutions to improve the condition of freshwater systems
- vi. Water Planning, Management and Governance in coherence and also promote convergence in the planning and implementation of various actors /line departments / institutions on the ground
- vii. Develop, review, adapt and actively disseminate water governance solutions.

Focus Area of Implementation:

- i. Awareness Generation
- ii. Trainings/Skill Development
- iii. Pilot projects

Activity Plan:

As suggested by the NWM the proposed action plan covers three areas. The first activity is awareness building and the second activity is to train and capacitate the selected members from the villages and the third activity is demonstrating the suggested activities in the field for adoption on various technologies, techniques, methods and practices for water efficient agricultural practices to minimise the water use and increase the water use efficiency duly protecting the yields. The activity wise description is mentioned as below.

(a) Awareness Creation:

Awareness generation is aimed at bringing the behavioural changes vis a vis the conscious decision making for adopting the water conservation, management and governance issues. The overall goal of awareness generation is not only aimed at bringing changes among the communities but also for the people involved in planning and implementation of developmental projects at grass root levels including the officials from Panchayat / Block level for MNREGA, drinking water, irrigation etc, who ultimately would be responsible for convergence in making sure that the planning and implementation of the activities are in tandem and the competing demands are addressed and water use efficiency is achieved.

The main activities proposed under the awareness generation are as follows.

Campaign on emerging water crisis , local water challenges and its impact on livelihoods and action required from the community
Campaign on Water use efficient technologies and cropping practices
Campaign on water security, safe drinking water, Water quality issues, safe WASH practices and waste water management
Grama Sabhas to adopt Community commitments / resolutions and mechanisms for water conservation, management and Governance

It is proposed that there will be four campaigns once in each quarter in each GP. If the habitations are distant then the proposed activity will be conducted in each of the habitation. For conducting each of the camps it was proposed that around Rs 15,000 will be sufficient which includes refreshments, resource person fee, wall writings with key messages, travel, venue costs such as shamiyana, chairs or tables, public address system, photographs etc. It is expected that in each of the Panchayat all the stakeholders will be contacted to disseminate the key messages on importance of judicious use of water and minimise the water use through water efficient technologies and practices.

(b) Training/ Skill Development:

The second activity proposed by the NGM is very important. The trainings and skill development programs are aimed at teaching the farmers, decision makers and key sector stakeholders on bringing the change in the behaviour of people. The residential two or three day programs clubbed with an exposure visit are the most efficient platforms to build the skill sets. The trainings focussing on skill development and trainings are aimed at enhancing the capacity of the PRI members, leaders, farmers and women on better agricultural practices to save water and minimize the wastage and promote measures for equitable distribution of water for different water users as well as for the sectors related to agriculture and other production sectors. These trainings will result in farmers adopting the practices of conservation oriented irrigation techniques and crop diversification. These training programs also aim at developing skills in water budgeting to allocate the water for agriculture, domestic, Industrial or other water related sector livelihoods. The main skill development programs identified are

GP Level two day training on water budgeting and preparing draft water budget and follow-up actions
Cluster level three days residential TOT for Water Champions on NWM objectives and strategies and follow-up actions
Convergence planning meeting with line departments on NWM objectives and joint action strategies to conserve water, minimizing wastage and ensuring equitable distribution through integrated water resources development and management.
One Day training cum exposure to lead/model(Adarsha) farmers on water use efficient technologies and crop/production practices and follow-up actions

Apart from the PRI members and local leaders, it is proposed that there will be **five water champions** selected from each GP who will be trained in water budgeting, water minimisation and crop rotation and crop management practices. The water champions are expected to follow up with each of the farmer on adoption of the practices imparted through the trainings and also guide them through these practices duly visiting their farms. Further the Adarsha Farmers innovative leaders of farming will be identified and trained in SRI paddy and use of other water use efficient practices.

The most important activity proposed under this category is to have a convergence meeting with all the related department officials responsible for water are being sensitized, trained and supported for making conscious choices for crop management as well as water budgeting etc.

(c) Pilot Projects:

The expected results of having the pilot initiatives are to experiment new tools, equipment, practices to conserve water. It is aimed that success of Pilot projects will induce PRIs / farmers to switch to other cash cropping patterns which will not only help in conserving soil moisture but will also give more sustainable profits from land based occupations. The proposed pilot initiatives under this first year action plan are following;

Demo plots on propagating Water use efficient technologies and cropping practices
Creating Model village to demonstrate water secure plans focusing on water and crop budgeting being implemented to address competing demands on water resources from agriculture, drinking and domestic use, and other livelihoods. This will be achieved by demonstrating efficient water conservation, management and Governance practices.

The costs of the pilot initiatives were worked out on the basis of one acre demo plot estimations which are available with Government line departments.

GOAL

- (1) To build a comprehensive data base in public domain and assessment of impact of climate change on water resources
- (2) Promotion of citizen and state action for water conservation augmentation and preservation
- (3) Focussed attention to vulnerable areas including over exploited areas
- (4) Increasing water use efficiency by 20%.

PROMOTION OF ENTERPRENUER

9 SAFAI KARMCHARIS LIVELIHOOD ENHANCEMENT

SUPPORTED BY	NAVAJEEVAN
TARGET POPULATION	Safai Karamcharis/Manual Scavengers/Waste Pickers
PERIOD	2019 onwards (ongoing)
LOCATION	Andhra Pradesh State

GOAL

To eradicate the practice of Manual Scavenger apart from the laws there needs to be sensitization drive about the prevalence of caste system for the persons involved in Manual Scavenger all belong to the lowest strata of the society who are looked down upon by the society hence, leaving them with less to no job opportunities.

Progress

Awareness programs/ Base line survey is going on to know the current status and situations of the Manual Scavengers/ Safai Karamcharis/ Waste Pickers and their dependents

COVID-19	
10	AWARENESS PROGRAM ON COVID-19
SUPPORTED BY	NAVAJEEVAN
TARGET POPULATION	Working Population
PERIOD	2020 onwards (ongoing)
LOCATION	Working Area

We Navajeevan have taken this as a responsibility to save our people from this COVID-19 and in this critical COVID-19 situation since from the Janatha Curfew onwards, we started awareness campaigns to the people about this COVID-19, precautions to be taken, sanitization, health, maintaining the physical distance and to stay home stay safe.

On the day from Janatha Curfew onwards Mr.K.Sahadevaiah, President of Navajeevan Organization started giving awareness Speech and song in the social media to participate in Janatha Curfew, to stay home and stay safe advisory, precautions to be taken, sanitization, health and maintaining the physical distance.

Navajeevan Team is continuously in touch with community and moving to the fields even though the risk ahead's. We continuously giving awareness about the precautions to be taken to prevent Covid-19

COMPLETED PROGRAMMES

	NAME OF PROJECT	NO. OF BENEFICIARIES/ FAMILIES	SUPPORTED BY	PERIOD
1	Dalit housing project	69 Families	IRDWSI/ NMZ/BFW	2004-05
2	Tsunami relief and rehabilitation	2618 Families	ACT,KNH Through IRDWSI, SRUTI,SDTT, NOVIB, EED, and MCC	2005-08
3	VSS-community mobilization	800 Families	AP forest department	2003-05
4	Watershed and community mobilization	500 Families	DWMA (District Water Management Agency)	2004-05
5	RBC (Residential Bridge Course)	100 Children	Rajiv Vidya Mission (SSA)	2005-07
6	Indiramma (Housing program)	185 Families	AP - Housing Board	2007
7	Social engineering in Lift Irrigation schemes	2096 Families	APSIDC	2008 -2009
8	Mobile Medical Unit	5000 families	Tata trust and Govt of India	2007 to 2011
9	SWAGATHI Project (STI/HIV/AIDS Prevention)	2092 Female Sex Workers	HLFPPT/BMGF	2009-2011
10	Cyclone and Flood Relief	2200 Families	SDTT	2010-2011
11	Mangrove Restoration Project	760 Families	CRenIEO/BFN/GNF	2010-2012
12	Education to Migrant Children's	967 Drop out Children's	AEA/SSA	2012-13
13	Rythukosam under APPSM	Podalakuru Mandal	Govt of AP/ ICRISAT	2015-2016

GOVERNING BOARD

S.No	Name	Qualification	Age	Designation	Occupation
1	K.Sahadevaiah	BA.BL.	41	President	Social worker
2	A.Santha kumar	Inter	39	Secretary	Social Worker
3	Ch.Vijayakumar	SSC	30	Treasurer	Social worker
4	Dr.R.Gopal Reddy	MBBS	70	Executive Member	Rtd. DM & HO
5	M.Bindhu Madhavi	Inter	38	Executive Member	Social worker
6	B.Sunanda	BA	37	Executive Member	Social worker
7	K.Balamma	BA	40	Executive Member	Social worker
